

VINEET S P

Mysuru, Karnataka | 9449400895 | vineetsreekanth22@gmail.com | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analyst with hands-on experience applying Python, SQL, and machine learning to real business problems. Built a sales forecasting model on 275 days of live pharmacy data achieving $R^2=0.651$, and developed end-to-end analytics projects spanning NLP, dashboarding, and predictive modelling. Product Developer of MedID — an ABDM-compliant, interoperable family health app with Aadhaar-based deduplication; obtained ABDM sandbox approval. Seeking a Data Analyst role where I can contribute analytical rigour and practical problem-solving from day one.

SKILLS

Languages & Tools: Python (pandas, numpy, scikit-learn, matplotlib, seaborn), SQL (PostgreSQL), Power BI, Excel, Jupyter Notebook

Techniques: EDA, Regression Modelling, NLP/Sentiment Analysis, Feature Engineering, K-Fold Cross Validation, Data Cleaning & Wrangling, DAX, Power Query

PROJECTS

Pharmacy Sales EDA & Revenue Prediction | Python, scikit-learn, pandas [\[GitHub\]](#)

- Analysed 275 days of real pharmacy sales data across 4 dimensions: daily trends, YoY growth, doctor-wise contribution, and patient footfall
- Discovered NCR patients correlate 0.75 with daily sales and generate 3x revenue per visit (₹589 vs ₹186); pharmacy grew 18.2% YoY from 2024–2025
- Built Linear Regression model ($R^2=0.651$, MAE ₹2,761); confirmed stability via 5-Fold CV (Mean $R^2=0.652$) — proprietary real-world data

Drug Review Sentiment Analysis | Python, NLP, scikit-learn, TF-IDF [\[GitHub\]](#)

- Classified 215,063 patient drug reviews into Positive/Neutral/Negative sentiment using TF-IDF + Logistic Regression
- Achieved 80.84% accuracy; benchmarked against Naive Bayes and SVM with text preprocessing: stop word removal, lemmatization, n-gram features

IPL Cricket Analysis Dashboard | Power BI, Power Query, DAX [\[GitHub\]](#)

- Built 5-page interactive dashboard on 1,095 matches and 260,920 delivery records covering Title Winners, Top Batsmen, Toss Analysis, Top Bowlers
- Engineered bowler summary table via Power Query Group By to resolve economy rate aggregation issues in DAX

Additional: SQL Analytics — 55 progressive queries (PostgreSQL, JOINS, CTEs, window functions) | Excel Sales & Compliance Analysis (PivotTables, VLOOKUP, dashboards) — github.com/vineetsreekanth

EXPERIENCE

Product Developer | MedID [Website](#) | [Prototype](#)

Mar 2026 – Present

- Building MedID — an ABDM-compliant, interoperable family health app with Aadhaar-based deduplication for portable health records across India
- Obtained ABDM sandbox approval; built Karnataka facility database (~34,000 records via KPME scraping)
- Designed full product spec: three-path signup, age-based access tiers, AI-generated report summaries and insurance document storage

Business Analytics Contributor | Vivas Medicare, Mysuru

Present

- Collected, structured, and maintained 3 years of operational pharmacy data (patient counts, doctor-wise sales, daily revenue)
- Identified revenue concentration risk: ~60% revenue linked to one physician's patient footfall; findings informed inventory decisions

Project Engineer | Wipro Ltd, Bengaluru

Dec 2022 – Present

- Completed structured .NET development training as part of campus placement programme

EDUCATION

B.E. — Industrial & Production Engineering

The National Institute of Engineering (NIE), Mysuru

Aug 2018 - Jun 2022

Karnataka Pre-University College — PCMS

Jnanasudha Pre-University College, Karkala

Jun 2016 – May 2018
